

COPTIC BIBLICAL TEXTS IN THE BEINECKE LIBRARY

(PLATES 1-4)

The Yale Papyrus Collection of the Beinecke Rare Book and Manuscript Library (Yale University) includes five Coptic biblical manuscripts, preserving portions of six Old Testament books in the Sahidic dialect. The inventory numbers and contents of these manuscripts are as follows.¹

P.CtYBR inv. 846(first text)	Judges 9:7-19
P.CtYBR inv. 1779	Psalms 77-78 (76-77 Rahlfs)
P.CtYBR inv. 1781(first text)	Daniel 8:11-9:13
P.CtYBR inv. 1782(A)	Joel 2:19-23
P.CtYBR inv. 1782(B)	Joshua 7:1-3
P.CtYBR inv. 2118	Proverbs 20:28-21:4, 21:6-16

Of these six texts, only the excerpt from the Psalms has been published.² With the permission of the Beinecke Rare Book and Manuscript Library, I am pleased to publish the five remaining texts in honor of our colleague, A. I. Elanskaja.

In the following descriptions, the first dimensions given are the maximum dimensions of the manuscript in its present condition, height by width. Most of the other measurements are approximate, the results of careful averaging or estimation.³

¹ The Beinecke Library is currently revising the inventory system of its Papyrus Collection. Every effort is being made to retain the old inventory numbers, to change them only when it is necessary to do so in order to rationalize the system. The current indication "P.CtYBR inv." distinguishes the new numbering system from the old "P.Yale inv." system. The "P.CtYBR inv." numbers of the manuscripts treated here are the same as their old "P.Yale inv." numbers. In the new system, "(A)" indicates the front of a manuscript *as conserved*; "(B)" indicates the back.

² Joseph Vergote and George M. Parássoglou, "Les Psaumes 76 et 77 en copte-sahidique d'après le P. Yale Inv. 1779," *Muséon* 87 (1974) 531-541. This manuscript is part of the acquisition that also includes P.CtYBR inv. 1781 and 1782, discussed below; it had already been described by Theodore C. Petersen, *A Collection of Papyri: Egyptian, Greek, Coptic, Arabic ...* (Kraus Catalogue 105; New York [1964]) 28-29 (no. 41), with a photograph of the front.

³ The method of description used here owes much to Bentley Layton, *Catalogue of Coptic Literary Manuscripts in the British Library Acquired since the Year 1906* (London 1987) liv-lxvi.

Judges 9:7–19. P.CtYBR inv. 846(first text). Parchment, 195 × 147 mm, a damaged codex leaf (pp. **NA/NB** [51/52], the end of a quire). Flesh and hair sides are not distinguishable. The leaf was erased thoroughly, and a Coptic magical text, P.CtYBR inv. 846(second text), was written across p. 51 (perpendicular to the first text). The leaf was folded in half horizontally, and then six times vertically beginning at the outer margin (the bottom of the magical text). It is now creased in some places, partly shrivelled and blackened, and some portions of the inscribed area have been lost through deterioration; the entire outer margin of the leaf is missing (broken off along the first vertical fold, which followed the marginal ruling). This leaf was purchased from Phocion J. Tano in Cairo in February 1931. During 1986 and 1987, it was flattened to the extent possible and conserved between acrylic sheets. As now conserved, the front (A) of the manuscript is the recto (p. 51).

Each page is inscribed in two columns of 27 lines each. The leaf is ruled according to Leroy pattern 00A2 or 00C2;⁴ the first line of text is outside the ruled area. No evidence of pricking is visible. The dimensions of the written area are 144 × 124 mm, the dimensions of a single column being 144 × 56 mm, with a space between the columns 12 mm wide, and margins of 26 mm (top), 25 mm (bottom), and 23 mm (inner). Assuming the lost outer margin to have had a width equal to that of the inner margin, an assumption supported by the widths of the areas between the vertical folds, the original dimensions of the leaf were 195 × 170 mm.

The script is much like Agostino Ciasca and Giuseppe Balestri, *Sacrorum Bibliorum Fragmenta Copto-Sahidica Musei Borgiani...* (3 vols.; Rome 1885–1904) 3: pl. 23, or Henry Hyvernat, *Album de paléographie copte...* (Paris/Rome 1888) pl. 3 (= Georg Zoega, *Catalogus Codicum Coptorum Manu Scriptorum qui in Museo Borgiano Velitris Adservantur* [Rome 1810] pl. 1, class 1, no. 2): vertical strokes are upright; thick-and-thin style; **ⲙ** is made with four strokes, the two middle strokes forming a **V**; **ⲉⲟⲥ** are wide; **ⲡⲓⲓ** are tall. The height of ten lines, including interlinear space, is 55 mm. The columns are flush along the left margins, without capitals or initials. The justification of the right margins also appears to be quite regular, a regularity achieved sometimes by the use of a dipole to fill out a short line (51:i.14, 17; 51:ii.4, 8, 9; 52:i.5, 26; 52:ii.3, 10); a superlinear stroke to indicate a line-final **ⲛ**

⁴ Julien Leroy, *Les types de régleure des manuscrits grecs* (Paris 1976) 1.

(51:i.18; 51:ii.22); or an **ⲟ** written above **ⲓ** for a line-final **ⲟⲓ** (51:i.1; 52:ii.9). There is no visible evidence of marginal decoration. The page numbers are written above the outer edge of the written area, the quire number on p. 52 above the inner edge. Each of these three numbers is marked simply with a superlinear stroke.

The Yale leaf is not a part of any of the other five Sahidic manuscripts in which Judges is preserved.⁵ A careful comparison of the amount of text on the Yale leaf with the length of Judges in Thompson's palimpsest makes it clear enough that in the Yale manuscript Judges began on p. 1.⁶ This conclusion does not necessarily imply that Judges was the first text in the codex, since pagination could have begun anew with the beginning of a new text. Unfortunately, the quire number on p. 52 is all but illegible. It appears to include a thick diagonal stroke sloping down from left to right and hence is best read **ⲁ**, **ⲁ**, or **ⲁ**. Before this letter there is a mark that is not clearly identifiable as ink, but may be. If so, **ⲁⲁ** and **ⲁⲁ** must be added to the preceding list of possible readings.

The only other manuscript that preserves the same passage of Judges as the Yale leaf is Thompson's palimpsest,⁷ but there the beginning of the passage is lost on a missing leaf. Thus the Yale leaf provides the first attestation of Judg 9:7b–9a in Coptic. In the edition below, all variants in Thompson's manuscript (Tho.) are noted except when they entail only superlineation or punctuation.

Except for a few letters here and there, the text on the Yale leaf is virtually invisible without the aid of ultraviolet light, and even with this aid the text only becomes legible if the reader is equipped with some knowledge of what letters to expect. Even though many letters must be dotted as uncertain nonetheless, I am, in Thompson's words, "morally sure" of most of them.⁸ In order not to clutter the notes, I have omitted superlinear strokes from the transcription when they cannot be seen over letters that are themselves at least partly visible; probably such strokes may be restored with confidence in 51:i.4, 8, 14, 17, 20 (*bis*), 21,

⁵ Three of these manuscripts are conveniently outlined by Peter Nagel, "Studien zur Textüberlieferung des sahidischen Alten Testaments," *ZÄS* 110 (1983) 70–74 (tables 11, 12, 14); the fourth is a leaf in Vienna edited by Walter C. Till, "Saidische Fragmente des Alten Testaments," *Muséon* 50 (1937) 187–190; and the fifth is the palimpsest manuscript edited by Herbert Thompson, *A Coptic Palimpsest Containing Joshua, Judges, Ruth, Judith and Esther in the Sahidic Dialect* (London etc. 1911).

⁶ The text of Judges would have ended around p. 122.

⁷ Thompson, *Palimpsest* 183–185.

⁸ Thompson, *Palimpsest* vii.

23, 27; 51:ii.4, 6, 14 (*bis*), 25 (*bis*), 26; 52:i.1, 3, 12, 14 (*bis*), 18, 24, 26; 52:ii.7, 8 (*bis*), 9, 11, 12, 18, 20, 25, 26. Similarly, diaereses may be restored in 51:i.15, 24; 51:ii.12, 14.

51:i.9–10 **ΠΕ]ΧΕ**: not enough space in the lacuna to restore **ΑΥΩ** **ΠΕ]ΧΕ**. **10** After a lacuna of two leaves, Tho. p. **СИН** (218) begins **ΧΟΕΙΤ**. **19** An undecipherable trace at the end of the line may be from a decorative line filler, without which the line is very short. **21** **ΝΤΟ**: omitted Tho. **23** Perhaps a dipole at the end of the line.

51:ii.9 **ΕΙΝΑΚΩ**: **ΕΙΝΚΩ** Tho. **11–12** **ΝΡΡΩΜΕ**: **ΝΝΡΩΜΕ** Tho. **14** **ΤΦ**: obscured by a crease in the parchment. **15** **ΝΤΑ**: **ΤΑ** Tho. **23** **ΑΥΩ** **ΠΕΧΕ**: **Α** could also be **Δ** or **Λ**; **ΥΩ** **Π** very uncertain; **ΠΕΧΕ** Tho. (omitting **ΑΥΩ**). **23–24** **ΠΕΧΕ**...**Σ**: **ΠΕΧΕΤΕΖΡΑΜΝΟΣ** is expected (thus Tho.), but the trace before **Σ** is from **Α**, **Δ**, or **Λ**; the other traces are very indistinct.

52:i.1 **ΤΑ**²**Ζ****Σ**: **ΤΑ**²**Ζ****Σ** Tho.; emend thus. **2** **ΑΜΗΕΙΤΝ**: **ΑΜΗΙΤΝ** Tho. **3** **ΝΤΕΤΝ**: omitted Tho. **13** **ΜΠΑ**¹**Ι**: obscured by a crease in the parchment. **14** **ΑΒΕΜΕΛΕΧ**: **ΑΒΙΜΕΛΕΧ** Tho. **18–19** **[ΖΙ]Ε-ΡΟΒΑΑΛ**: **ΖΙΕΡΟΒΟΑΛ** Tho.; cf. 52:ii.24. **20** **ΗΕ**¹**Ι**: **Η** Tho.

52:ii.2 **ΝΧΑΧΕ**: **ΝΕΝΧΑΧΕ** Tho. **3** **ΝΑ**²**Ζ****Μ**: **ΝΕ**²**Ζ****Μ** Tho. **7** **[Τ]Ν**: the superlinear stroke was probably a connective stroke over both letters. **11** **ΩΦΕ**: **ΩΒΕ** Tho. **14** **Α[ΒΕΜΕΛΕΧ]**: **ΑΒΙΜΕΛΕΧ** Tho.; cf. 52:i.14. **24** **ΖΙΕΡΟΒΑΑ[Λ]**: **ΙΕΡΟΒΟΑΛ** Tho.; cf. 52:i.18–19. **25** **ΗΕ**¹**Ι**: **Η** Tho.; perhaps restore thus.

Daniel 8:11–9:13. P.CtYBR inv. 1781(first text). Parchment, 298 × 178mm, a damaged codex leaf (pp. **СОА/СОВ** [271/272]; no quire number is visible, but perhaps only as a result of deterioration). Flesh and hair sides are distinguishable by color; the recto (p. 271) is the flesh side. The leaf was erased with varying degrees of thoroughness, and a Coptic magical text, P.CtYBR inv. 1781(second text), was written across both pages (partly parallel and partly perpendicular to the first text). The leaf was folded into thirds vertically, and then six or seven times horizontally beginning at the top. It is now creased, partly shrivelled and darkened, and very brittle. It has suffered extensive deterioration, especially along the inner edge, where the margin and part of the inscribed area are missing (probably broken off along one of the vertical folds). This leaf was purchased from H. P. Kraus in New York in May 1964. Theodore C. Petersen, who described most of the manuscripts in this acquisition for Kraus's sales catalogue, identified the text as Dan 8:7–9:12 and dated it to the 6th century C.E.⁹ The leaf consisted of five fragments mounted in glass. In 1987, the arrangement of the fragments was corrected and the manuscript conserved between

⁹ Petersen, *A Collection of Papyri* 30–33 (no. 43), with a photograph of the front.

acrylic sheets. As now conserved, the front (A) of the manuscript is the recto (p. 271).

Each page is inscribed in two columns of varying numbers of lines: 38 and 40, 36 and 35 lines respectively. There is no ruling. The dimensions of a single column are 218 × 73 mm,¹⁰ with a space between the columns 14 mm wide, and margins of 50 mm (top), 30 mm (outer), and 30 mm (bottom). The original dimensions of the written area can be estimated to have been 218 × 168 mm. Assuming the lost inner margin to have had a width equal to that of the outer margin, the original dimensions of the leaf were 298 × 228 mm.

For the script, see pl. 1 below. The height of ten lines is 57 mm. The columns are flush along the left margins, without capitals or initials. The right margins do not seem to be particularly regular; only once did the scribe try to adjust the length of a line by a graphic device, an *o* written above *γ* for a line-final *ογ* in 272:i.13. There is no visible evidence of marginal decoration except for a *zeta*-shaped paragraphus above 272:i.1, the beginning of Daniel 9. The page numbers are placed over the approximate center of the outermost column of each page. Each of these numbers is followed by a colon and marked with a superlinear stroke, above which are three points forming a triangle, with a fourth point above the apex. This ornamentation is fully preserved on p. 271, partially so on p. 272.

The Yale leaf is not a part of any of the other Sahidic manuscripts in which Daniel is preserved,¹¹ although I am unable to eliminate one of these manuscripts decisively from such consideration for lack of sufficient data: Paris, Bibliothèque nationale copte 129³211.¹² A rough comparison of the amount of text on the Yale leaf with the length of Daniel in one of the codices outlined by Nagel¹³ suggests that in the Yale manuscript Daniel began around p. 250.

The only other manuscript that preserves the same passage of Daniel as the Yale leaf is the manuscript referred to for comparison in the preceding paragraph. The relevant portion of this manuscript was

¹⁰ But the innermost column on each page seems to have been about three letters wider than the outermost column.

¹¹ See A. Vaschalde, "Ce qui a été publié des versions coptes de la Bible," *RBi* 29 (1920) 253–254; Walter C. Till, "Coptic Biblical Texts Published after Vaschalde's Lists," *BRL* 42 (1960) 229; Layton, *Catalogue British Library* 27 (no. 24).

¹² G. Maspero, *Fragments de la version thébaine de l'Ancien Testament* (MMAF 6; Paris 1892) 269–270; cf. L. Delaporte, "Catalogue sommaire des manuscrits coptes de la Bibliothèque nationale," *RevOrChr* 18 (1913) 91.

¹³ Nagel, "Studien zur Textüberlieferung" 70 (table 11).

edited by Ciasca.¹⁴ Since there is a gap of twelve pages in this manuscript before Dan 8:18, the Yale leaf provides the first attestation of Dan 8:11b–18a in Sahidic. The entire passage on the Yale leaf is known in Bohairic.¹⁵ In the edition below, I have limited my restorations to lines that are well enough preserved to permit a reasonable degree of certainty in restoring the lacunas. For Dan 8:11b–18a, these restorations are based on consideration of both the Greek text (Theodotion) and the Bohairic version. Not all variants in Ciasca's manuscript are noted; omitted are variants that entail only superlineation or punctuation, and most of the variants that are simply orthographic in nature, i.e., *ñ* for Ciasca's *εν* (272:i.23), *ṛ* for *ερ* (272:i.23; 272:ii.12), *πñ* for *πεν* (272:i.27; 272:ii.14, 16), *ṛq* for *ρεq* (272:ii.30), *ṣñ* for *ṣεν* (272:i.5), *ṣ* for *δ* (271:ii.36), *ει* for *ī* (271:ii.2), *ι* for *ει* (272:i.18), *ΘΙΗΜ* for *ΘΙΛΗΜ* (272:i.12; 272:ii.3, 34), *ṛπο* for *επο* (271:ii.14; 272:i.5), *ñnaṣṛṛñ* or *ñnaṣṛṛm* for *naṣṛpen* or *naṣṛṛm* (272:i.13, 30, 32–33).

Although in general this leaf was not so thoroughly erased as the Judges leaf described above, it is often more difficult to read because of the extensive deterioration and the reinscription on both sides. Here again, ultraviolet light and a prior knowledge of the text are indispensable tools for the reader, but even so I feel less moral certainty about the dotted letters than in the previous text. In order not to clutter the notes, here too I have omitted superlinear strokes from the transcription when they cannot be seen over letters which are themselves at least partly visible; probably such strokes may be restored with confidence in 271:i.17 (*bis*), 32 (*bis*), 37; 271:ii.5, 7 (*bis*), 13, 14, 22 (*bis*), 23, 28 (*bis*); 272:i.22, 26 (*bis*), 28, 32; 272:ii.1, 7 (*bis*), 8, 12, 13 (*bis*), 16, 19 (*bis*), 20, 35. Similarly, diaereses may be restored in 271:i.28; 272:i.1.

271:i.1-2 θн[сiα: i.e., ουσiα. 4 ..[.].: the traces are indistinct
but do not seem to suit ρχαεiε or ρχα[γ]ε as expected. 4-5 Restore
αγ[ω] or αγ[т̄]. 18 The restoration of the first lacuna is one or two
letters short; perhaps restore [во н̄бипп]. Only the upper point of
the colon is visible. 22-23 After εвоλ, н̄бιοу2орасиς н̄рωме
is expected, but the traces do not suit this reading. 25-26 Cf.
E. A. Wallis Budge, *Miscellaneous Coptic Texts in the Dialect of Upper
Egypt* (London 1915) 305 (line 2 up). 32 There is space for two
letters in the lacuna after x. 33 After a lacuna of six leaves, Ciasca
p. pпe (185) begins шторт̄р.

271:ii.1 ες: omitted Ciasca. 7 ετ[ζ]nmητε: lacuna over n; emend to ετ̄nmητε; ε̄τεnmητε Ciasca. 13 Only the upper point of the colon is visible. 16 τωου: τωουn Ciasca; emend thus. 23 ωορ: χοορ Ciasca; emend thus. 26 [n]q̄: the super-linear stroke was probably a connective stroke over both letters. 28 κρογ: κρογ n̄qazepatq̄ ēxm̄ptako n̄za Ciasca. 32 μεε: με Ciasca. 34 εza: n̄za Ciasca. 40 Probably the end of the line was left blank.

272:i.1 τωορπ̄ n̄romπε: τ̄ωορπε n̄romπε Ciasca. 4 εza: omitted Ciasca. 6 a]noq: anok de Ciasca. 7 εz[pa]: zpa Ciasca. 8 n̄nromπε: n̄n protrudes into the left margin; n̄neromπε Ciasca. 15 z̄n̄z̄n: m̄n̄zen Ciasca. 25 Possibly restore M[ei or cazwon. 27 z̄n: n̄ Ciasca. 31 n̄p̄p̄woy m̄n̄: nenepwoy m̄n̄nen Ciasca. 32 neiote: nenēiōte Ciasca. 36 πn: π Ciasca.

272:ii.2 ioyaa: ioyaa Ciasca. 12-13 we]neztqh: w̄n̄ztqh Ciasca. 15 cazwon: cazwon Ciasca. 33-34 ...]nn[entaγ: lacuna over nn; katanentaγ is expected (thus Ciasca).

Joel 2:19-23. P.CtYBR inv. 1782(A). Papyrus, 53 × 114 mm, a fragment from the middle of an odd sheet (not from a codex). There are no kolleseis. This fragment is part of the acquisition which also includes P.CtYBR inv. 1781, discussed above (Dan 8:11-9:13). Petersen dated it to the 6th or 7th century C.E. Noting the occurrence of "Jesus" on the back, he suggested that "the papyrus appears to be a remnant from a Coptic book of theological discourses."¹⁶ Leslie S. B. MacCoull later identified the text on the back as Josh 7:1-2 and offered a more detailed description of the manuscript.¹⁷ The manuscript had been assembled out of four fragments and conserved in glass. In 1986, these fragments were repaired and joined more precisely, and the manuscript was conserved between acrylic sheets.

The text is written along the fibers in a clumsy script; see pl. 2.1 below. The height of ten lines would have been 71 mm. The script is too irregular to permit anything other than a rough calculation, but it can be estimated that the lines were originally 55 letters long. Thus the column must have been two to three times as wide as the width of the

extant fragment, somewhere between 228 and 342 mm. There is no basis on which to calculate the original height of the column. The text on the back is by the same scribe, but it is from a different work (Josh 7:1-3, edited below) and is oriented properly for reading not when the manuscript is turned over from side to side (as would be the case with a codex leaf), but when it is turned over from top to bottom.

I know of no other fragments of this manuscript preserved elsewhere. But the passage on the Yale fragment is known from a manuscript in Paris edited by Maspero (Bibliothèque nationale copte 129³217),¹⁸ and also from Akhmimic¹⁹ and Bohairic²⁰ versions. In the edition below, all variants in Maspero's manuscript (Masp.) are noted except when they entail only superlineation or punctuation. *A* and *B* refer to the Akhmimic and Bohairic versions, according to the editions just referred to.

In the transcription I have made no attempt to restore the long lacunas beyond the words that are partially preserved.

P.CtYBR inv. 1872(A): (Joel 2:19) [- - -]†na†thyt[n - - -]²[(2:20) - - - π]εm̄z̄it †naq̄xq̄ εβ[ολ] m̄m̄w[tn - - -]³[- - - †]n̄akto m̄peqzo εzaī eteθaλ[acca - - -]⁴[- - - τα]ko naī εzaī ayw πεq̄w̄n[o]w [- - -]⁵[(2:21) - - - n]z̄ht̄ pa we ay[w - - -]⁶[(2:22) - - - a]y†oγw εzaī n̄oinpwt n̄terh[mos - - -]⁷[- - - ελοο]λε m̄n̄neq̄w n̄knte ay† n̄t[εγ̄om - - -]⁸[(2:23) - - - π]ε[tn]n̄[oy]t̄ε x̄εa[q̄†] n̄h[tn - - -]

3 κτο: takō Masp., teko *A*, tako *B*. 4 naī: naēi Masp. 6 i: i certain, diaeresis restored. 7 neq̄w: w̄ could also be w̄ or q̄; tw̄ Masp., twoy *A*, oyw *B*.

Joshua 7:1-3. P.CtYBR inv. 1782(B). Papyrus, 53 × 114 mm, a fragment from the middle of an odd sheet (not from a codex), the other side of the manuscript described above (Joel 2:19-23). On this side the text is written across the fibers, and the lines are more widely spaced (ten lines = 103 mm); see pl. 2.2 below. The passage preserved is known from Thompson's palimpsest,²¹ which the Yale text seems to parallel

1 βει: q1 Tho. [α]γ[- - -]: the trace is the bottom of a vertical stroke and can be read λ; hence possibly [αγ]λ[ωβε; αγλωβέ Tho., αγζωγτ Shore. 2 σβρι: lacuna over ι (possibly read ι); ζαμβρι Tho. 4 ναγ[η: νναγη Tho.; possibly restore ναγ[ηc. 5 - - -]- οηλ: βα[ι]οηλ Tho., βεοηλ Shore. μοc: μμοc Tho.; emend thus. 6 - - -]ηλ: lacuna over these letters; π[ι]cραηλ Tho.; possibly restore thus, though π[ι]ηλ is also possible.

Proverbs 20:28–21:4, 21:6–16. P.CtYBR inv. 2118. Parchment, 85 × 168 mm, a codex sheet (pp. πνβ–πνε [152–155], the center of a quire). Flesh and hair sides are distinguishable by color; flesh faces flesh at the center of the quire (pp. 153–154). The sheet is marred by one original hole at the bottom of the outer margin of pp. 152/153; it has suffered some minor deterioration and creasing around the edges and shows several stains, where the ink has blurred sometimes. This sheet was donated by H.P. Kraus in December 1966. Its text had been identified the previous year by Theodore C. Petersen, who dated the manuscript to the 4th or 5th century C.E.²⁴ In 1987, it was removed from a glass frame, mended slightly, and conserved between acrylic

²² A. F. Shore, *Joshua I–VI and Other Passages in Coptic Edited from a Fourth-Century Sahidic Codex in the Chester Beatty Library, Dublin* (CBM 9; Dublin 1963) 41–42; cf. Rodolphe Kasser, *Papyrus Bodmer XXI: Josué VI, 16–25, VII, 6–XI, 23, XII, 1–2, 19–XXIII, 7, 15–XXIV, 23 en sahidique* (Cologny-Geneva 1963), and Kasser, *L'Évangile selon Saint Jean et les versions coptes de la Bible* (Neuchâtel 1966) 90–167.

²³ The Yale text also shares its one word from Josh 7:3 with a Paris leaf (Bibliothèque nationale copte 129¹⁹⁸) edited by Maspero, *Fragments AT* 130–131; cf. Delaporte, "Catalogue Bibliothèque nationale," *RevOrChr* 17 (1912) 392–393.

²⁴ Petersen to Kraus 6 August 1965. A copy of this letter is preserved in the Beinecke Library's "Papyrology File."

sheets. As now conserved, the front (A) of the manuscript is the inside of the quire (pp. 153–154).

Each page is inscribed in a single column of 19 lines. The leaves are ruled according to Leroy pattern 20A1;²⁵ the first line of text is outside the ruled area. No evidence of pricking is visible. The dimensions of a single column are 70 × 59 mm, with margins of 10 mm (top), 16 mm (outer), 5 mm (bottom), and 9 mm (inner). Three sewing holes occur in the fold at the spine, at intervals of 14 mm, 24 mm, and 25 mm from the top of the sheet.

For the script, see pls. 3–4 below. The height of ten lines is 37 mm. The text is laid out in verses, with the run-over indented 5 mm (one letter space), except in 153:17, 154:15, and 155:14, where the run-over of five, one, and four letters respectively is written above the ends of the lines. The following lines begin such "verses" (* indicates lines that are additionally marked by a straight paragraphus above): 152:2*, 4, 6*, 9, 11*, 15, 18*; 153:1, 4*, 7*, 10, 12*, 15, 17, 18; 154:1*, 4, 6*, 12*, 15, 16, 17, 19; 155:2, 4, 9*, 11, 14*, 15, 17*, 19. The right margins are not particularly regular, despite the use of several devices to shorten some of them slightly: a superlinear stroke indicates a line-final *ⲙ* in 153:1, 154:18, 155:11; *ⲟ* is written above *γ* for a line-final *ⲟγ* in 152:11, 153:4, 155:18; *ⲟ* is written above *ⲟ* for *ⲟⲟ* near the end of 154:18; and letters are ligatured near the ends of 153:13, 154:18. The page numbers are written above the outer edges of the columns. Each of these numbers is preceded and followed by commas and marked by a superlinear stroke (extending from the beginning of the number only as far as the left-hand edge of the third digit). This ornamentation is fully preserved on pp. 152 and 153, partially so on pp. 154 and 155.

The Yale sheet is not a part of any of the other twenty-two Sahidic manuscripts in which Proverbs is preserved,²⁶ although I am unable to eliminate one of these manuscripts decisively from such consideration for lack of sufficient data: Paris, Bibliothèque nationale copte 129^{1974a}.²⁷ A comparison of the amount of text on the Yale sheet with the length

²⁵ Leroy, *Types de règle* 5.

²⁶ Nineteen manuscripts are listed by William H. Worrell, *The Proverbs of Solomon in Sahidic Coptic According to the Chicago Manuscript* (OIP 12; Chicago 1931) xvi, where "BMC 39" and "SP" should be combined as a single manuscript (the opinion of Crum and von Lemm). Three manuscripts can be added to this list: Walter C. Till, "Kleine koptische Bibelfragmente," *Biblica* 20 (1939) 246–247; Till, "Saidische Fragmente des AT" 213–214; and Sebastián Bartina, "Un nuevo papiro copto de Proverbios 15,27–16,8 (PPalau Rib. inv. 6)," *StudPap* 9 (1970) 39–49.

²⁷ Worrell, *Proverbs* xiv–xx, 23.

of Proverbs in Worrell's manuscript makes it seem likely that in the Yale manuscript Proverbs began on p. 1,²⁸ but the possibility cannot be ruled out entirely that Proverbs was preceded in the codex by a short text, possibly about 11 pages long. The former conclusion does not necessarily imply that Proverbs was the first text in the codex.

The passage preserved on the Yale pages is known from three Sahidic manuscripts. Using Worrell's abbreviations, these manuscripts are Ch,²⁹ Z24,³⁰ and (fragmentarily) BMC 951.³¹ The passage is also preserved in Akhmimic³² and dialect P³³ versions. In the edition below, variants are noted only when they do not agree with any of the other three Sahidic manuscripts (i.e., at 152:1 [corrupt], 152:2 [where the dialect P version is also cited], 153:15, 154:12, 155:3 [corrupt]).

The superlinear strokes in this manuscript vary both in shape, from points to long strokes, and in placement. I have transcribed them all as strokes, and I have transcribed as connective strokes any that are placed otherwise than directly over a single letter. All punctuation marks have been transcribed either as raised points (regardless of their precise shape in the manuscript) or as colons.

155:3 **ΖΗΠΕΘΟΥ**: if a faint mark above **ΖΗ** is in fact ink, read **ΖΗ**; **ΖΗΖΕΠΕΘΟΥ** Ch, Z24; emend thus. 6 **ΩΩ**: ω corrected from ω (erroneous stroke erased).

The Beinecke Library also owns a complete copy of the Gospel of Matthew in Bohairic and Arabic. This manuscript (GEN MSS Coptic 1) was copied in Cairo in 1838 for Robert Curzon.³⁴ It should also be noted that the Beinecke Library is the repository for the American Oriental Society's collection of manuscripts, which includes a small group of Coptic and Arabic leaves from the monastery of Bishoi in the
