

AN EGYPTIAN TEXT IN GREEK CHARACTERS

By W. E. CRUM

Found by E. Lobel among the Oxyrhynchus papyri, in Parcel 21, marked '3B (? 3rd Behnesa season), 29 F.' $11\frac{1}{2} \times 6\frac{1}{2}$ in. Fibres →. Other side blank. From a roll, of which one complete column and a fragment of another are preserved.

THIS papyrus was handed to me in April, 1941, after other scholars had seen it, but had not had leisure to study it adequately. I have spent much time over it, but with the poorest results.¹ It is, I believe, the first manuscript to present us with an attempt, made in the demotic period, to reproduce a hieroglyphic text, phonetically transcribed into Greek characters, and in that respect its successful interpretation would be of no little interest. That an ancient text lies at the back of what we have here—or at least of parts of it—can hardly be doubtful, after Gardiner's convincing identification of the phrases in 11, 18, 19. Beyond that, however, progress seems at present to be blocked; scarcely a word is certainly intelligible. Indeed, for my part, I have failed to make the initial step towards interpretation—for the most part I cannot separate the words. The sole guide to word-division is the superlined $\bar{\alpha}$, which may be relied upon to begin a word; elsewhere it remains as uncertain as in the 'magical' phrases of the Greek papyri. A further obstacle to the interpreter is the constant intrusion of the sign < (v. at 3), whereof no explanation has so far been proposed. In such a text one suspects a plentiful element of scribal inaccuracy, due perhaps to dictation, more probably to ignorant transcription of imperfectly understood models and betraying itself in the variously spelt words in parallel passages.²

The script should be contemporary with that of *Oxyrh. Papyri* VI, pl. iv (= Schubart, *Gr. Pal.*, Abb. 86), datable about, or somewhat before, 150 A.D.³ It is a wholly Greek hand, with certain Egyptian—not yet positively 'Coptic'—additions, stylized to suit the general *ductus* (v. Table opposite).⁴ Of these ancient letters nine still cling here to the new alphabet, but by the time the Coptic character had once, through its use for biblical purposes, been standardized, three of them—all aspirates—had been discarded; two indeed (*h*, *k*) are no longer in use in the Old Coptic (*O*) texts.⁵ The Table on the opposite page shows the forms of the nine Egyptian letters in two nearly related

¹ A. H. Gardiner, B. Gunn, and P. C. Smither have read my copy and made invaluable suggestions, duly noted as they occur. I am also grateful for the use of Sir H. Thompson's copies of demotic texts and of his MS. dictionary; also for the reading of a notable word.

² One may compare the frequently divergent spelling of the same word or phrase in the *Ἐφέσια γράμματα*.

³ H. I. Bell concurs in this estimate.

⁴ Besides those in the Table the MSS. Sch. and Mich. use other two old letters; Hor. (v, 28, 32, vi, 20) has one not yet identified.

⁵ On the other hand, the syllabic $\dagger$ seems to have been devised in the Coptic period, whether it be a monogram of τ and ι , or dem. *ti* 'give', stylized; hence added last to alphabet. Found in no *O* text; even omitted occasionally from the Coptic alphabet (Hall, pl. 29).

demotic and in the five Old Coptic MSS., besides our papyrus; abbreviations as follows: *DM* (Demotic Magical Papyrus) ed. Griffith and Thompson, from Hess's photographic plates; *Mythus* (*vom Sonnenaue*) ed. Spiegelberg, from those of the edition; Hor(oscope) ed. Griffith *ZÄS* xxxviii, 71; Sch(midt), unpublished papyrus acquired by Carl S., 1937, who gave me a photograph¹. Mich(igan) P. 6131, ed. Worrell, *AfSL* LVIII, 84, who kindly sent photographs; Mim(aut) papyrus, ed. Möller in *PGM* I, photograph thanks to Ch. Boreux; Paris, *suppl. grec* 574, ed. Erman *ZÄS* xxi, Möller, l.c.

DEMOTIC CHARACTERS IN THE NEW OXYRHYNCHUS AND COGNATE PAPYRI

1. A reminiscence of this form in two 4th-cent. papyri: Budge, *Bibl. Texts*, pl. ix, and *Jews & Chr.*, no. 1922 (pl. iii), the latter likewise in a mixed dialect. A different development in *BM Cat.* 711 (pl. 11). In Sch. the simple stroke recalls that used in place of a cumbrous sign in hieroglyphic (Erman, *Gr.*⁴ § 52).
3. No longer much resembling its dem. original. In *DM* represents *spiritus asper*, yet there (*Index* 113, 117, 237, 604, *Gloss* 450), as here (15 = 44), it varies with *H*.
4. In 6, 21, 32 has almost reached the Coptic form *g*. Cf. Mich., whose *š*, it may be noted, also resembles ours. The *h* in *Jews & Chr.*, *ut sup.*, is also made thus; it is not (as I there described it) a reversed *g*.
5. In no *O* text. Once in a Greek gloss (Spiegelberg, *Demotica* II, pl. 10 a).
7. Most likely = *h > š*, throughout our text. I cannot recognize it anywhere as *d*, which it represents a few times in Paris (*ZÄS* xxi, 107 *inf.*). In Mim. used as here; in Hor. twice only, *πρῶτη* and *πρῶτα*. Sch. seems to have it in *αοα* and *ααρη*; but there it should be *σ*, the more so since normal *α* often occurs. Can it be intended for no. 9?
8. Again our form is most like that of Mich. The younger MSS., Paris (77) and Mim. (670), betray a knowledge of Coptic *α*,² evidence perhaps that the scribes are consciously archaizing.
9. Not used in any *O* MS. Whether it represents *σ* or *κ* it is hard to say.

¹ Not among his MSS. bought by Michigan Univ. (so Worrell); others he had sold to Louvain, 1936 (*Muséon* L, 5). Its present whereabouts I know not.

² Twice in *PGM*, no. vii (346, 511). In neither place is script different from that of Greek context.

Besides these demotic signs, adopted and converted into letters, this papyrus makes use of others: those for *mn* (10), *eipn*, or *pn* (52), *hnc* (10), and two unread signs; also of the group *whm* (3). No *O* text offers so much evidence of having been written while demotic was still intelligible, if not familiar.¹ The only other non-Greek feature in the script is the superlineation. This, compared with subsequent Coptic practice and even with that of the younger *O* MSS., is strictly limited, being used only on initial *n*- before consonants and not consistently there.² Further and quite arbitrarily, to superlined *n* is now and then added a line below (23, 24, 32, 33, 34, 48, 51), a peculiarity not found, to my knowledge, elsewhere. Diaeresis is frequent on *eī*, less so on *ai*, *oi*, never on the oft-recurring *ēi*. On *i* (32) it seems uncalled for.³ Except Paris, the *O* texts use it rarely; Hor. not at all. An accent seems to occur twice (14, 46), for what purpose I know not.⁴ Finally it may be noted that the combinations *θ*, *φ*, *χ* are unknown here, save in the name Thaut (3).⁵ Nor are they in use in the earlier *O* texts (Hor., Sch., Mich.), but in Mim. and yet more in Paris, they are freely, if still unskilfully, used.

The idiom of this text could not be termed Coptic; it too often shows words and forms no longer current in the Christian period. Nevertheless it has grammatical features and some words that have survived in one or other Coptic dialect. Indubitable examples of these are: verbs, *moute* 41, *neu* (ⲛⲁϣ) 12, *piri* 9, *phrēi* 41, *stm* 12, *htp(e)* 49, *hmam* 50;

nouns and adjectives, *beri* 51, (*e*)*sēt* 22, *iam* 20, *maie* 38, *noufe* 49, *nim* 10, *romi*, *rm-* 32, 11, *rm̄po* (*sic*) 13, *rin-* 12, *snaf* 6, *tēr-* 10, *ounou* 12, *Hēt* 15, *Htē-* 11; article, *p-* often, *t-* 14, 25, 39, 47, 51, perhaps 24, 36, *n-* perhaps 6 end, but *ni-* apparently 22; pronouns, *pē* 30, archaic *eipn* often, (*e*)*tn* 12, 13, 38, *tes-* 9?, *nef-* 21?, 29; relat., *et-* 13, 15?, 18, 20, 30, perhaps 5, 12 = 37, also *nt-* 10, 19, 20; possess. and obj. suff. as in Coptic; prepositions, *e-* 4?, 10, 22, 49, *era-* 12, 17, 20, 38, 48, *ero-* 18? (cf. 41), *n-* often, *nei* 42, *ne* 47?, *nef* 49, *mmas* 5, *mmatn* 21, *m-* 6, 9, 12, 16, 47, *mn-* 8, 46, *nm-* (= *mn-* ?) 5, 14, 41, 43?, (*ntn-*) *ntot-* 33, 36, *ub-* (ⲟϣⲏⲉ-?) 10, 31, *ha-* 7, also? 14, 15, 44 (*ha-*), *hi-* 41, *hn-* 27; tense pref.: 1st. pres., *f-* 6 (but cf. 52); 2nd pres., *ek-* 11; 1st pf., *af-* 24, *au-* 20, *haf-* 14?; rel., *etak-* 13; 3rd. fut., *eie-* 17, *ebe-* 7, its neg.?, *nnetn-* 5, its rel., *n(e)teue-* 12 (superline error);⁶ subj. *ntetn-* 7, *ntou-* 25?, 41, perhaps *tou-* 22, with *ša-* 53, *nša-* 21 (vbal.?, cf. *Dict.* 573a); neg. consuet., *mf-* 45?, *muē-* 9? (cf. *mḥ-* 15); uncertain *ar-* 16, 34, 45. On the negative side it is remarkable that common, one would say almost inevitable, Coptic words are absent, e.g. ⲁⲛⲟⲕ, ⲁϣⲱ and ⲟϣⲟⲟ, ⲕⲱⲛ, ⲕⲟⲗ, ⲉⲓ (?), ⲱⲉ, ⲉⲓⲛⲉ (? 5), ⲛⲟϣⲧⲉ (*v.* at 4), ⲥⲁⲛ, ⲥⲟⲗⲓ, ⲱⲱⲛⲉ (?47), ⲱⲁⲭⲉ, ⲭⲓ.

¹ The Greek magical book on *verso* of the *Mythus* has three demotic rubrics (*PGM* 11, 71, 76, 82). I recall no other instance.

² Paris likewise superlines *n* before consonants, but not elsewhere; Mim. also, but less often; Hor., Sch., Mich. never. One may ask whether dem. — (for *n*), so frequent in Hor. (though there before vowels too sometimes), did not eventually become the superline, instead of figuring as a letter; indeed there in *v*, 25 *ke* it seems to have slipped up above the letter.

³ Cf. M. Schwartz, *Gram.* § 43.

⁴ The accents in Paris, especially in its latter part, are more or less systematic (Erman, *ZÄS* xxi, 109); Hor. uses ' after final *n*, but it is not an accent (cf. ? CO. Ad. 39, ST. 14), and ' after other final consonants. Mim. marks word-ends with what looks like *ε*; no accents are discernible. Sch. and Mich. show no such marks.

⁵ Whether ξ (14 *bis*) is such a combination, or whether the first occurrence is in a Greek word is uncertain.

⁶ Gunn concurs.

EGYPTIAN MAGICAL TEXT FROM OXYRHYNCHUS (I)

Col. I

Col. II

EGYPTIAN MAGICAL TEXT FROM OXYRHYNCHUS (II)

Among features which belong to a pre-Coptic age are not only the words still written in dem. script (3, 4 *bis*, 5, 10 *bis*, 52), but the two or three instances (as recognized by Gardiner) of an attempt to reproduce Egyptian *clichés* in Greek characters (v. at 11, 18, 19). Moreover, we meet with various words and locutions: *bei*, *eipn*, *etērf*, *nrinf* 47, *ub*, *ubf*, *hta*, *hta(?)*, *hte*, *hatēt* and probably other prepositions, *snaf* with suff., *nbt*, *lou* 41, constructs *net*- 4, *rm*- 10, fallen into disuse by the time the Greek alphabet had been adapted to Christian purposes, that is, by the time the need was realized for Egyptian versions of the scriptures.¹ Of the other early specimens of an accommodation of the Greek alphabet, with the help of certain native letters (v. Table above), to the Egyptian language, only five have so far come to light. What is the relation of this 'Old Coptic' (*O*) material to our papyrus? The *O* texts are by no means homogeneous; they differ in date and *provenance*, as well as in idiom. Hor. is composed in a mixed *SA* dialect (*š* representing *ǧ*).² Sch.³ shows an archaic *S*, with *F* vowels here and there. Mich. again a mixture, with *F* (or *Bf*) predominating.⁴ Mim. is already *S*, with a few abnormalities.⁵ Paris was divided by Erman into two groups, each showing a form of *S*, with varying aberration from the normal.⁶ This last, the longest text, is also the oftenest intelligible, since it approaches nearest to Christian Coptic.⁷ To none of these texts can it be said that ours is closely related, though as in all of them, the dialect, judged by later Coptic standards, would be termed hybrid: a kind of *κωνή*, with Middle-Egyptian forms (be it *S*^a, *A*, or *F*) in a majority.⁸ As for the general obscurity which hinders the comprehension of our text, the earlier *O* texts are scarcely less difficult. Of Hor. it would be hard to find a phrase of which the meaning is not doubtful;⁹ what remains of Mich. looks equally unpromising.

An attempt must now be made to describe the contents of the new text. That it is—or opens with—an incantation or prayer is evident from the first word. But who is addressed? Gardiner, Gunn and Smither, on the strength of the words *sēb* and *hft* (v. at 1), answer that it is an 'enemy' of Onnōphris-Osiris, but beyond that they do not proceed. Neither have I any solution for this initial problem. There are clearly two or three key-words, the understanding of which would go far to enlighten us: besides

¹ It is only with the emergence of the Bible versions that we become aware of independent dialects. No biblical MS. uses language comparable to those of this or of the *O* papyri.

² πτϣ-, πτωϣ- v, 20, 22, ϡρωτ v, 7 may show a *B* tendency.

³ Presumably from Middle Egypt, since Osiris both of Abydos and of Hasrō (*Wb.* III, 168) are invoked.

⁴ *V. Worrell*, op. cit. 87. *š* occurs several times.

⁵ 349 πνι dat., 406 ογντ 'alone'?, 670 ϡωρϣ 'night'? Though the condition of the papyrus is deplorable, Möller's reading could be improved. He did not observe that the text is divided into sections: marginal ϡ 659, ϣ 670, ϣ 679 are legible. κωϣ, which he read in 661 etc., should be κωι = *κωιόν* (cf. phot., Deissmann, *Licht*⁴, Abb. 47, l. 3013). Possibly κωκ, κωϣ *Dict.* p. xvii *b ult.*, is a graphic deformation of this word.

⁶ Erman, *ZÄS* XXI, 106, Griffith, op. cit. xxxix, 79.

⁷ Scholars have disagreed as to whether *Ιησου* 3020 indicates Christian influence. Cf. *Ιησου* 2410. But there is no doubt about the Christianity of 1232-3, where the idiom, moreover, is considerably different from the remaining *O* of this MS. (cf. *PSBA* xx, 102). And Mim. 420 ινσωϣς πνετο is likewise significant.

⁸ *O* texts from Thebes (Paris and ? Hor.) might show connexions with Theban Coptic—the dialect of the local documents, ostraca, etc.—wherein many an archaic feature has survived. Theban dem. texts, *DM* and *Mythus*, almost contemporary with earlier *O*, might give similar results. If the former's glosses are to be a guide, the ratio between *S* and *A* will be found all but equal.

⁹ Griffith regarded it as 'hopelessly obscure' (*ZÄS* xxxviii, 76).

Gardiner wishes to state that, before the papyrus could be photographed, it had to be further flattened. This task he undertook, but thinks it possible that, in course of so doing, a letter or two may have become obliterated, or less legible. On this account my earlier readings may, in a few cases, be the only trustworthy record.

¹ In that case *n* in 31 should by rights be superlined. Elsewhere it precedes a vowel and our dilemma is not affected. Perhaps the *y* in *DM* v, 25 might be compared; cf. Griffith's note.

² Much of Coptic magic remained completely pagan, or all but so, invoking ancient gods and demons: Kropp nos. i–xi, xxxvii, lxxviii, Lange's in *Griffith Studies* and notably Worrell's in *Orientalia* IV, 17, with its quotations (?) from the *DM*.

³ A good proportion of these 'names' are obviously not nonsense, but so far neither their Egyptian nor Semitic elements have been systematically studied. The former perhaps gave a general term for such no longer intelligible jargon: ἐπίρρησιν αἰγυπτιαῖζεν (Lucian, *Philops.* 31, quoted by Dieterich, *Abraxas* 155n.).

Figures above a word refer to the lines in which that word recurs. Where a longer phrase is repeated a → shows that that phrase extends until a star * is reached. Dots on the line indicate quite illegible letters; dots below letters show that they are doubtful; letters below the line are suggestions or possible alternatives.

COMMENTARY

Col. I, 1. *O!*, with the exception perhaps of *prax(is)* 14, the only Greek word in the text.¹ Rarely thus in *PGM* (I, 110, 160; II, 178), though *ἰώ* similarly used, but hitherto mistaken for a magical name.² In parallel 17 *ai*. *Sro* 'ram' elsewhere (*DM* I, 12n.). *Sēb* (cf. 5, 9, 46), epithet of preceding word, or = *sbi* 'rebel' (Gardiner, Gunn). The word after *Ouenaf*r recurs thus, with following *n-*, in 2, 4, 6, 18, 23 (*bis*), 24, 25, 40, while in 4, 6, 24, 25 it has preceding *n-* as well. Recalls *hfty* 'enemy', but also *hft* 'in front of, before'. In 22 *hfteh* is similarly used; cf. preposition *hft-hr*. A preposition appears to me probable—especially in 23 (1°), 25—although Gardiner and Gunn prefer the noun, comparing *A* ~~ἰ~~ω[; Gunn notes that *hft n-* is not known in hieroglyphic.³ *Ousr-* construct as in *PGM* I, 74; II, 20, etc. Cf. *Οσερχενθεμενθει* op. cit. II, 124 (cf. *ZÄS*. XLIV, 95), also (? misread) *Ουσερσετεμενθ* op. cit. 20.

2. *Psohn*, read ? *sohm* (cf. 5). *Ator(e)* 'Hathor', followed by 'Tentyra', or by *τεντρο* 'the great goddess' (cf. 4)?

3. *Iaf* for *iatf*, though hardly likely, 'Fill his eye with salt'. Dem. *n-whm* (so H. Thompson) as a rubric: '(Say) again (what precedes)'. Cf. *whm* in *Proc. Brit. Acad.* XVII, 241 (vii, 11). 'Until (so that) Thaut (Thōth) seize him' seems impossible. *Θαύθ*

¹ Yet cf. *co DM* XVII, 11. Greek numeral Δ in 24 ff. (cf. *DM* XXIV, *verso* xiv). How pronounced?

² Exception: op. cit. II, 31.

³ Griffith, *Stories* 120 *hr hft* *n-* resembles our phrase in 22. Griffith queries the meaning; cf. *Ryl.* III, 235, 410. For *hr* = Δε *v.* *ZÄS* XLIV, 113.

dialectal or archaic, *PGM* II, 101; v. *Dict.* 462a. *Memt* = *momt* 16, cf. also 45. The sign < occurs many times (3 *bis*, 4, 6, 8 *bis*, 9, 14 = 39, 15, 16 = 46, 17, 23, 24 *bis*, 28 *bis*, 31, 48 *ter*, 49, 50, 52 *bis*). Omitted in 43, though used in 15; similarly? in 35 and 48. Corresponds to no dem. sign, though somewhat resembles <, *ayin*. If not a letter, may be punctuation, accent (emphasis), or other modification in declamation. In my attempts at interpretation I have ignored it.

4. If *hte* is preposition, cf. ? *PGM* I, 50(419) 12TE-, 60(635) 12TH-, 74(128) 12TA-. The dem. sign recurs in 5. If preceding space intentional, the *e* may join it (but cf. 5). Has several values in dem., both phonetic and determinative. Sign in 52, 53 different. *Keki*, cf. 47, 48 = ? 35, 23 *keke* 'darkness' or 'child'. *Netō* (reading group as intended for dem. *co* 'great'), constr. of *noute*, not recorded in *Dict.* Cf. *PGM* I, 50, 60(672) ΠΠΕΤΟ, *Ét. de Papyrol.* II, 230 (Lacau) ΠΠΟΤΩ; also perhaps 2 above.¹

5. *Sahmf*, thus as vb. trans. 19, 29(?); as noun 27(?), 30, 31, 32, 46. In Coptic the only trans. is 127 S, 128 B 'crush'; 129 is intrans. only. In hierogl. *šhm* 'be able' and *šsm* 'lead' (*Wb.* IV, 246, 285).² I fail to recognize a connexion here with either. *Pher* (cf. 23) might be 'enchant', but cf. ? 41.

6. *Mout*, goddess *Μούθ*? *Fohe* 'he stands'. *Snafs* 'her (its) blood'. The cross suggests dem. *ss* 'amulet', or may be mere punctuation.³ *T[mse]at* (cf. 24) cannot be read.

7. *Ntetenhrbrf* 'and ye overturn him (it)', cf. 128. But *h* makes this quite improbable and in 8 at any rate this meaning would not fit. *Hatetn* = ? 129. *Ubs* = ? 130; cf. *ubf* 10, 51, *ub* 31, 35; *ob* 8 may belong to these.

8. Omission after *net*? Or is this a noun? Cf. 5, 11. *Eipn* recurs 7 times, mostly after *mhau*: 'this day', as Spiegelberg, *Dem. Gr.* § 12 *m hrw ipn*, (cf. *DM* XI, 11 *mhaw pn*, *PGM* II, 22 ἐν τῇ σήμερον ἡμέρᾳ), *Proc. Brit. Acad.* XVII, 240 (v, 15) *grh ipn*. This pron. is no longer plur. only (Gardiner, *Eg. Gr.* § 110). *Mour (er)ak* 'bind on thyself'.

9. *Sihf*, cf. 131 'flake'. *Muēti* = *mhte* 15, 44. Perhaps *muē-ti*, *mh-tei*, where *mh* would be neg. 132 -; in 27 *h-* positive. *Piri* altered from *prri* (cf. 15): 'go forth from his mouth'. *Ti* vb. forming causative? (Spiegelb. *Dem. Gr.* § 113).

10. First dem. sign is *mn* 133 δέινα, as in *DM* Ind. 365 (cf. 435), Maspero, *Mém. s. q. pap. du Louvre*, pls. iii 17, v 18, 28, *Proc. Brit. Acad.* XVII, 241, vi 15, viii 8, 9, 12, all magical texts. Second dem. sign is *hnc*⁴: 'with every man that is in all this land' (Gardiner, though admitting *tae* = *to* scarcely possible). *Ni ubf* seems parall. to *ni htēf* 11; vb. of motion?

11. *Netf*, cf. 8. 'With every man, every *pct*, every *rhyt*, every *hnmmt*, and so forth' (*hmēr* = *hmt-r* Gardiner, citing P. Leyd. 347, 3, 9, 13, and often; also e.g. Budge, *Bk. of D.*, 113).

12. 'Who shall (= ? *ntiūw*- Gardiner) see me, with them that (or ? and who, cf.

¹ *Nt* for *ntr* *ZÄS* XXXVIII, 129 (Dyn. XXX) is not construct.

² V. Kuentz in *Bull. Soc. Ling.* 1933, 198.

³ Cross in Hor. IV, 32, v, 31 has in original no resemblance to one, nor is its meaning known.

⁴ Looks as though the initial *H* were expressed in this form.

JE*A* xiv, 86 ff.) shall hear my name, on this day and in this (*etn*, or ? *tn*, cf. 38) hour and this year' (v. at 8). Parall. 37 has *nnteu*-. For dem. v. Ort-Geuthner § 474.

13. *Rmpo*, emend ? *rmp etn* (Gunn). *Ens* seems to = *ēis* 38. *Kouki* (or ? *koukim*, v. next word), only *κοῦκλα* 'drum' (*Dict.* 109a) seems comparable, but improbable.

14. *Ehr* or *m.ehr*?, preposition, though hardly in 28. *Prax* ? *πράξις* '(magical) procedure', or 'recipe' (*PGM* I, 77). *Pro* for *prō* 'winter', or *tpro* 'mouth' (Gunn, though Coptic forms all *tap*-), with 2nd sing. (*e*)*k*- following. *Mhaheī* 'before me'? Not *ēisn*. *Haf*- cf. ? *χαϝ*- (*Spiegelb. Dem. Gr.* §§ 188 ff.), assuming *t* to belong to following word.

15. *Mhau* after *n*- thus only in paral. 44. After it supply *eipn* (v. at 8) and a verb (cf. 44). 'Her body beneath my body'. Note different aspirate in 44. *Mhteī* (cf. 9) must include subject of *piri* (Gunn). With *pri* for *piri* cf. 36 *sne* for *sine*. *Ar*- here and 16 2nd sing. fem. prefix?

16. *Momt*, cf. 3. *Mahēis* = *mēis* 46. Cf. prep. *mmah* (Gunn, but what would follow?) *Be(h) Htēis*, cf. 44. *Nha* just possible. 'Do ye incline her heart beneath. . .'

17. *Hikt* 'my magic'? (Gardiner). 'I will say the . . . to thee'. *Ai* (recurs 27), cf. dem. interj. 'y (though that is glossed *η*, *DM* Index 20) or *hy* (ib. 545) and Coptic *αιε*, *αιε* (*BM* 1224), *αι* (*Ryl.* 104, 4) = *χαετο*, *αιετο*. But it might, if vb. followed, be merely 1st sing. perf. (Gunn).

18. Does circle indicate deletion (cf. parall. 1, 40), or is it the cartouche, which often encloses this name? *Nt*- for *nk*-(*ng*-) or *ntou*- (cf. 41). 'And thou (they) pronounce for me every word' (but with *nbt* cf. *nim* 10, 11, 19 Gardiner). With *mout*(*e*) *eroi* cf. ? *mour* (*er*)*ak* 8. Note *moute*, not *mtau*, as might be expected (*Dict.* 196a).

19. 'In every place (*bei* = *αιε*?) where So-and-so is' (*amou* = *αιεαιε* Gardiner). *Menk* ? neg. fut. (*DM* Ind. 256 *bnnk*, cf. ? *menf* 48), but in 25, 35 this looks improbable; *mnk* (Griffith, *Stories*, 176n.) equally so.

20. 'He (it) that is in the sea.' *Mēt* 'ten', rather than 'depth of water' (*Manich. Psalm.* 86n.). *Mtor* 'Bear witness'? (Gunn). 'They have requited (?) him for you through? *Kēbk*.'

21. Either god's name, *Kῆβκισ* (*Rhind* Gloss. 520), or *Kēb* with 2nd *k* prefixed to *nēou*? (but *nē* quite uncertain, so too *pi*). Same dilemma in 33. *Mmatn* (so in *Rom.* 12, 1 *F*) possibly accusative (*Dict.* 399a). *Nefnaue ntēmi* 'his spears for wounding' (cf. *tm·t* *DM* Ind. 1018, *Wb.* v, 450). If so, *nšatou* 'for slaying them'. But if *ahof* were vb. (cf. 6), *nšatou*- might be its prefix: 'so that, until they'.

22. *Ni-mhau*, or *nim hau*? If former, not 'day' (cf. 8). *Hfteh* v. at 1. *Naboutai* in form = *Ναβουθαι* Naboth (1 Kings xx); probably a coincidence, not implying acquaintance with LXX. Cf. *PGM* II, 83 *Πετενναβουθι* among magical names *Ουβαστε*, *Ιησους* etc. *Πετε(ν)*- recalls many masc. proper names (e.g. *Πετενεβθως*? *Namenb.* 314); if so, difficult to explain here, but would show *N.* a deity or demon. Others in *-thai*: *Sappathai*, *Bēthai* (in Kropp), perhaps on Hebrew model. Egyptian names in *Neb*- not comparable, e.g. *Νεβουητι* (*PGM* II, 128), nor those compounded with Nabū-Nebo. *R* vb., as 23?, 53 'Make that they (cf. *A* *τογ*-, *Hor.* v, 32 *ntou*-) go down to Egypt' (cf. ?? *B* *χαεαι*).

23. *Nsphou*, *n* ? superlined. Read ? *shpou*. *Mouhrēr* dem. 'scarab', written *mwhrr* in *Mythus* Gloss. 348, where (despite *h* = *h*) *ⲁⲙⲉⲣⲏⲣⲉ* is proposed as identical. But this is properly *ⲟⲩⲁⲙⲉ- 2*. (*Dict.* 704a, yet cf. *ⲟⲩⲁⲙⲉⲉⲥ*, *ⲙⲉⲙⲉⲉⲥ*). Perhaps emend -*ⲉⲟⲩⲉⲣⲉ* 'dung-eater', a more suitable designation. *Npher* as epithet, 'magical' (cf. *B* *ⲫⲁⲥⲉⲣ* etc. Gunn doubts this).

24. *Be[i]*, cf. ? 19 'place', or 'rod' (*Dict.* 27b) for mixing, stirring? Cf. *ⲉⲱⲥ*, *ⲉⲟⲥⲉⲥ*. With *omet* cf. ? 31, 35, 42. With *dati* cf. *ⲭⲱⲧⲉ* 'pierce', or *ⲉⲃⲉ* 'kill' (*ZÄS* LI, 114). *Tmseat* seems = *tmo* 25. If *t* were article, *mo* might be 'mother' and *mse* related to *ⲙⲉⲥⲉ* (cf. ? at 15 *sne* = *sine*, *pri* = *piri*); but *at* (*atn*?) is difficult, as is *ⲁ* 'four' with either of these.

25. *Menk*, cf. 19. *Tēit* 'give' seems impossible, otherwise 'we have given (made) his name to stand' (cf. *ohe*, *ohi* 6, 52). *Touho*, whether the town (properly *Touho*) or vb. 'add' (is this causative likely in so old a text?), remains unintelligible (cf. 26, 32, 33). For (ⲏ)ⲧⲟⲩⲭⲱ?, if *h* could = *ⲭ*(ⲏ).

26. *Uēn* quite doubtful.

27. *Ai*, cf. 17. Is *serirat*, or -*iiat* parall. to *hnoutmseat* 29? If so, next word should be *emtor* (cf. 20). Slight trace of - before *ntm*.

28. *Deitre* noun, 'this . . . '.

29. *Shams* for *sahms*? Cf. 5, 19. *Ouitaue* plur. of *wyt* 'embalmer' (*Rhind* Gloss. 76, cf. Stern § 215), or *ⲟⲩⲟⲩⲉⲧ* 'stele, pillar'. Again 34. Next words much blotted.

30. *Sohm* noun, cf. 5. Comparable are *sh̄m* 'shrine', *sh̄m* '(divine) power', *sh̄m* 'sistrum', also *šsm* etc. (*Wb.* iv, 289 ff.). Which is its progenitor? *Stm* precluded if following is *mehr* (cf. 14) and constr. unlikely if this is a preposition.

31. 'She weeps to' (? *ⲉⲣⲓⲙⲉ ⲟⲩⲏⲉ-*). *Nom* noun with suffix? Cf. 35, 42. *Sei* should perhaps be *seH*. In *shho* the *h* shows that *š* is not intended. Cf. *h̄hah̄ha*, *sabah̄ha* (*PGM* I, 66) with *ⲭⲁⲭⲁ* (II, 175), *ⲱⲃⲁⲭⲁ* (ib. 124). *Piēisn-* 'their'?

32, 33. 'Hawk-man', is this probable? Gunn compares *bik rmtw* (Lacau, *Textes Rel.* lxxxiii, 12).

33. *Mehsie* for *mesie*? (*Dict.* 185b; for intrusive *h* before *s*, op. cit. 632a), 'whom Kēbk begat'. *Promi nbeik* would thus be a divinity (Osiris?). *Sine* (or ? *ksine*, cf. 21) with *ntn-* not found in Coptic: 'pass away from him'. Cf. 36.

34. *Ar*, 'do, make', as ? 3 = 16, 15 = 45, more probable than 2nd fem. prefix. In *Hor.* v, 7, 9, vi, 3 *ⲁⲣ* vb. and *ⲁ-ⲣ* 'to do' hard to distinguish. Ib. v, 30 it seems the vb.: 'To keep watch (and) to be at rest alone'. Not *totf*.

35. *Keeki* altered. After it not *mi* (cf. 48).

36. *Sne* = *sine*, cf. 33.

37, 38. Cf. 12. 'Who shall see him and who shall hear his name . . . , on day this and in this right (true) form (? *ⲙⲉⲙⲓⲏ*). Thou didst come to her, thou didst . . . ' Gunn suggests a difference between *mnt-* here and *nt-* 12. 'To me former seems error for latter.

39. *NtmH* incomplete? Cf. 19 *ⲏⲟⲏⲏ*. *Sēb* etc. v. 1, 17.

40. *Nbei nim*. Cf. 19.

41. Cf. 18. Coptic would be *ⲉⲓ(ⲉⲏ?)ⲙⲁⲁⲩ ⲏⲙⲟⲩⲧⲉ ⲏⲙⲉ*. *Phrēis*, *ⲏⲟⲏⲧⲉis*, *ⲁⲏⲉis* perhaps 3rd fem. suffixes, but cf. remarks in Introduction above, p. 24.

42. After *nomf* 1 or 2 erased. *Moi*, cf. ? 1; *ik* probably cancelled.
44. *Behtëis* with *ḥ* in 16. Doubtful if *ḥaḥētf* paral. to *ḥaḥikt*.
45. *Nes*; this word-division compelled by 3, 16. So goddess *Sachme(t)* = Σαχμη *PGM* I, 143n., with *ne* 'to thee', impossible.
46. *Mn*, is this var. of *nm* 14, 41, 43, or neg. vb.?
47. 'Ever to become dark', or 'become a child for thee (fem., cf. *nto* 46), as one like him (lit. of his name)'. I do not know how to place or explain the hieroglyph (= ) at end of line. Dem. 'y, *hy* 'hol' are so written (*DM Ind.* 20, 545).
48. *Menf* neg. fut. (cf. 19), if *ēti* were a vb. Could *mi ere* = *mē era*? *Rine* 'thy name', fem.
49. 'Satisfy him (?) with good food this day', though this should be *hre*.
- 50, 51. *Iaus* just possibly *iats*. 'Thou art hot (lustful?) for him??, for So-and-so.' Not *m[mesie] mn* (*Dict.* 185b), as half-letter after *m* is not *m*, but straight-backed, possibly *n*. *Maie* (38 same?), 'the new form'.
52. *Datoua* 'blasphemer'? 'This day', v. Spiegelb. *Dem. Gr.* § 12 for *pn* similarly written (Canopus).
53. 'So that (until) he make (do) ten . . . this day.'

Col. II gives the ends of 12 lines, showing well-known magical names.

II, 6. Dialectal for *Maskelli Maskellō*, on which Eitrem, *P.Os.* I, 72. In *Pistis* (Schmidt 365) *Maskelli* is the name of 'a mighty archon'. Rest of line probably *Phnouke ntabaōth*, as usually after *M.M.*

II, 7. Should be *Oreo-*, but looks like *Areo-* (cf. above *Mes-* for *Mas-*).

II, 8. Not yet explained. Though *Nebou* = *Nebo* (*Naβω*, *Nεβους*) is suggested (Wünsch, *Ant. Flucht.* 19n., *PGM* II, 65n., Hopfner, *Arch. Or.* III, 333), Egyptian *neb* seems as likely. *Neboutos: ouēri* (*PGM* II, 23) perhaps shows right word-division; yet cf. ib. 39 *soire*.

II, 9. H. Thompson reads only *syh* in middle of this. Perhaps it transcribed 8 (cf. 12).

II, 10. *Hēi lahēi lal*[. . . Cf. *DM* XII, 20 for similar names; also v, 11 *lahy*.

II, 11. *Pakeptoth pa*[. Same in *PGM* II, 70 (-τωθ), *JE* XV, 234, latter suggesting *pa[kebraōth*.

II, 12. H. Thompson reads perhaps . . . *skr Thwt* (cf. 11), which recalls the frequent *Pakerbēth*.

P.S. L. 10, comparable signs for *mn*: Stegemann, *Paläogr.*, Taf. 22 (Zaubert.) and ? Leyd. *MSS. Coptes* 435.—L. 22, *Nabouthai* is angel of 10th hour: MS. P. Morgan 23, 71 ff.
